LINEAR OPERATOR STANDARD FEATURES

Belt drive or chain drive

Choose from our exceptionally quiet belt drive or our solid-performing chain drive.

Safety first, safety always

When the obstacle sensing beam is crossed, the door reverses to fully open.

Smooth, quiet operation

Built-in vibration isolation system for both motor and chassis keeps noise and vibration from being transferred to the rest of the house.

Park or reverse door

To permit both ventilation and access, the garage door can be stopped and parked during either upward or downward travel.

Secure, responsive remote control

Linear remote controls operate over a long range and employ high security technology to prevent anyone from stealing your code and using it to gain entrance to your home.

Deluxe wall station

All controls are large and clearly marked (door UP/DOWN control, courtesy light switch, and vacation mode). Illumination for finding wall station in the dark.

Automatic courtesy light

Dual 100W MAX lights illuminate the garage for five minutes every time the operator is used.

Easy door release

When you need to open or close the garage door manually, simply release the operator's quick-disconnect trolley.

Assurance through self checks

The operator's self-diagnostic system continuously checks to see whether everything is working properly. In the unlikely event of a problem, it will pinpoint the trouble and let you know by flashing the courtesy light. You can often solve the problem on the spot with a call to your Linear dealer.

OPTIONS

Your Linear dealer is a great source for everything from miniature key ring transmitters, to multi-button visor transmitters, to wireless keypads.

Linear, the leader

In addition to making a top quality line of residential garage door operators, Linear is the leading source of remote controls for the entire garage door industry and has 40 years of pioneering experience in wireless technology and garage door operator manufacturing.
